

`\downbracefill`

`\upbracefill`

These commands respectively produce upward-pointing and downward-pointing extensible horizontal braces. T_EX will make the braces as wide as necessary. These commands are used in the definitions of `\overbrace` and `\underbrace` (p. ‘`\overbrace`’).

Example:

`$$\hbox to 1in{\downbracefill} \quad`

`\hbox to 1in{\upbracefill}$$`

produces:
