

`\beginsection` *⟨argument⟩* `\par`

You can use this command to begin a major subdivision of your document. *⟨argument⟩* is intended to serve as a section title. `\beginsection` surrounds *⟨argument⟩* by extra vertical space and sets it in boldface, left-justified. You can produce the `\par` that ends *⟨argument⟩* with a blank line.

Example:

`\ldots` till she had brought herself down to nine inches high.

`\beginsection` Section 6. Pig and Pepper

For a minute or two she stood looking at the house `\ldots`
produces:

... till she had brought herself down to nine inches high.

Section 6. Pig and Pepper

For a minute or two she stood looking at the house ...
