

muglue

1

muglue. *Muglue* is a kind of glue that you can use only in math formulas. It is measured in **mu** (mathematical units). One **mu** is equal to $\frac{1}{18}$ em, where the size of an em is taken from family 2 of the math fonts. T_EX automatically adjusts the size of *muglue* according to the context. For instance, a glue size of **2mu** is normally smaller within a subscript than it is within ordinary text. You must use the **\mskip** command to produce *muglue*. For example, '**\mskip 4mu plus 5mu**' produces mathematical glue with natural space of four **mu** and stretch of five **mu**.
