

## 1

`\magstep` *⟨number⟩*

This command expands to the magnification ratio needed to magnify everything in your document (other than `true` dimensions) by  $1.2^r$ , where  $r$  is the value of *⟨number⟩*. *⟨number⟩* must be between 0 and 5.

*Example:*

```
\magnification = \magstep1 % Magnify by ratio of 1.2.
```
