1

 $\verb|\mkern|| \langle mudimen \rangle|$ 

This command produces a kern, i.e., blank space, of width  $\langle mudimen \rangle$ . The kern is measured in mathematical units, which vary according to the style. Aside from its unit of measurement, this command behaves just like \kern (p. '\kern') does in horizontal mode.

Example:

 $0\$  0 \quad {\scriptscriptstyle 0 \mkern13mu 0} produces:

 $0 \quad 0 \qquad \quad \circ \quad \circ$
