1

`\cal`   use calligraphic uppercase font
`\mit`   use math italic font
`\oldstyle`   use old style digit font

These commands cause TEX to typeset the following text in the specified font. You can only use them in math mode. The `\mit` command is useful for producing slanted capital Greek letters. You can also use the commands given in "Selecting fonts" (p. '`selfont`') to change fonts in math mode.

Example:
```
${\cal XYZ} \quad
{\mit AaBb\Gamma \Delta \Sigma} \quad
{\oldstyle 0123456789}$
```
produces:
  $\mathcal{XYZ}$ $AaBb\mathit{\Gamma\Delta\Sigma}$ 0123456789
