**1**

`\lower` ⟨*dimen*⟩ ⟨*box*⟩
`\raise` ⟨*dimen*⟩ ⟨*box*⟩

These commands move ⟨*box*⟩ up or down by ⟨*dimen*⟩ (which can be negative). You can only apply `\raise` and `\lower` to a box that's in a horizontal list.

*Example:*

```
Are you feeling \lower 6pt \hbox{depressed} about the
                \raise 6pt \hbox{bump} on your nose?
```

*produces:*

Are you feeling   depressed   about the   bump   on your nose?
