1

`\tracingrestores`   [⟨*number*⟩ parameter]

If this parameter is greater than zero, TEX will record in the log file the values that it restores when it encounters the end of a group. If `\tracingonline` is greater than zero, this information will also appear at your terminal.

Some production forms of TEX ignore the value of `\tracingrestores` so that they can run faster. If you need to use this parameter, be sure to use a form that responds to it.
